Mahara trading company Grassia nursery

Mahara Trading Company is the local strategic partner of Eco green Company. For over twenty years, it has specialized in supplying a wide variety of plants to local nurseries and various projects. The company stands out for its ownership of a network of nurseries across several countries under the trade name "Grassia," a registered trademark fully owned by Mahara. Its branches are located in Saudi Arabia, the Sultanate of Oman, the Republic of Turkey, and Thailand, enabling it to swiftly meet the demands of customers and major projects, regardless of the size or type of trees required. Mahara sources, collects, and nurtures the trees needed by customers from these countries in its nurseries, ensuring they meet the import requirements set by the Saudi Ministry of Agriculture. This includes issuing all necessary health certificates before shipping plants to Saudi Arabia. With extensive experience and advanced scientific knowledge in caring for large and perennial trees, Mahara prepares them for shipping across seas and countries, using methods that ensure they can survive without water for several months until they reach the Kingdom's ports. This expertise contributes to the successful cultivation of trees in projects and their continued prosperity and growth.
